About Me

Detail-oriented junior manual tester focused on functional, regression, and exploratory testing of web applications. Experienced in designing clear test cases, writing reproducible bug reports, and validating APIs with Postman. Familiar with Cypress and Python for lightweight automation, and eager to grow into a well-rounded QA engineer.

Education

Electronic & Telecommunication Technical School— Mechatronics Technician]

2023 – present

Certifications

C1 Advanced English Certificate — Cambridge

2026

ISTQB Certified Tester Foundation Level (CTFL) — (In Progress)

Experience

PGS50 — Junior Manual QA Tester (Intern)

2026

Jira Postman Cypress

- Designed and executed manual test cases for web applications, covering functional, regression, and exploratory testing.
- Logged, tracked, and verified defects in Jira with clear reproduction steps, severity, and screenshots.
- Validated REST API endpoints in Postman — status codes, response schema, and edge cases.
- Supported automation by maintaining a small set of Cypress end-to-end checks.

AMCO Inc. — QA Tester (Intern)

2025

Jira Postman

- Performed smoke and sanity testing on new builds before release.
- Collaborated with developers to reproduce and confirm fixes.
- Helped keep test documentation organized and up to date.

Skills & Tools

Test Design

Test cases test scenarios exploratory testing regression testing bug reporting

Test Management

Jira (issue tracking, workflows)

API Testing

Postman (status codes, schema, edge cases)

Automation (familiar)

Cypress (E2E) Python

Operating Systems

Windows macOS

Other

Basic SQL Chrome DevTools

Soft Skills

Attention to detail analytical thinking clear communication curiosity
